

citizenM Shoreditch

citizenM's Shoreditch hotel reinforces the brand's popularity for affordable luxury and innovation in the heart of the Shoreditch Conservation Area.

216 modular rooms are stacked above a plinth structure, referencing tube carriages on a neighbouring viaduct, while the façade is carefully considered – comprising layers of textured glass that animate the building throughout the day and night.

This project achieved a BREEAM Excellent rating for reduced carbon emissions and new construction techniques.
