

MoD Projects

We are a major supplier to the MoD for CTM (counter terrorism measures) compliant buildings. Over the last decade, we have provided high quality buildings for use by MoD personnel and their families. Our building systems are adaptable to the diverse and often challenging needs of the MoD. Using strong steel-framed modular materials, our buildings are robust and fit for purpose.

Since 2006, we have successfully delivered well over 2500 bedrooms for military personnel across Salisbury Plain and Aldershot. We're also pleased to have worked with Rollalong and Aspire on the 'Larkhill Single Living Accommodation' which was shortlisted for Volumetric Technology and Housing Project of the Year at the Offsite Awards 2018.

With an emphasis on quality, Rollalong buildings are manufactured to exacting standards to provide high performance modular buildings that satisfy the MoD's accommodation requirements. The MoD benefit from minimal disruption and our buildings are delivered faster than traditional methods for single living accommodation.
